

We asked
Nature's Gain
some questions

Will Nature's Gain work for me?

If taken as directed, most women should achieve results with Nature's Gain. Even if size increase is not required, Nature's Gain can still help to make the breasts firmer and fuller.

What is a typical Nature's Gain Programme?

Most users will notice firmer and fuller breasts within 3 to 4 months. For a 1-cup size increase the full 6 month programme is recommended. For an increase of 2-cup sizes or more, further month's supplies will be required.

What do I have to do?

The Nature's Gain Programme is very easy. You simply take 3 tablets twice a day and drink 2 litres of water throughout the day. Most users require a 5-6 month programme to achieve a 1-cup size increase.

What are the ingredients?

The active ingredients within Nature's Gain are Hops, Barley, Buckwheat, Oats, Rye, Wheat, Malt and Fennel. Nature's Gain contains no animal products, genetically modified ingredients or hormones.

What if I only want to firm my breasts?

When following the Nature's Gain Programme the initial results will be the breasts becoming fuller and firmer. If you want to increase the size of your breasts, you simply continue with the programme until the desired results are achieved.

Do I have to take Nature's Gain forever?

No. Once you have achieved satisfactory results, simply reduce your tablets to just 2 a day for a further 12 weeks to maintain your results. This is just one more box of Nature's Gain.

Will I gain weight?

No. Nature's Gain stimulates new glandular tissue growth in the breasts. The Nature's Gain daily intake is less than 4 calories.

How long was Nature's Gain researched?

The active ingredients within Nature's Gain were researched for 20 years in Europe and were clinically proven to firm and enlarge women's breasts in controlled laboratory conditions.

NATURE'S GAIN IS NOT AVAILABLE IN STORES.

Results achieved after using Nature's Gain for 6 months.

How much does it cost?

Lowest Price Ever!
UB Reader Offer!

The normal price of the 6 month programme, enough for most users to gain one cup size, is £450, but if you order within the next 14 days, Ultimate Beauty Readers can take advantage of a special offer price of £199, a saving of over £250.

SAVE OVER £250

According to the Nature's Gain website (www.naturesgain.com), to obtain firmer and larger breasts (1 cup size), most users will need to purchase a 6 month programme. Following this you have a maintenance period of just a few weeks, which ensures your results are permanent (subject to future ageing, weight loss or pregnancy).
