

# Michelle's Story

Michelle from Kent followed the Nature's Gain Programme for 6 months.

*"Even with my busy schedule, I still managed to complete the programme and was pleased with the results. I am now a 32C"*

Over the years I had noticed I was starting to lose shape and firmness in my breasts. As a model, I need to look my best at all times. I had heard from another model that there were natural alternatives to cosmetic surgery that had been proven to be successful. I was working on a TV commercial and discussing these alternatives with a friend who then put me in touch with Nature's Gain. I wanted to firm and enlarge my breasts by one full cup size so I decided to try the Nature's Gain Programme.

The programme was easy to follow and, even with my very busy schedule, I still managed to complete the programme and was pleased with the results. I am now a 32C.

I chose Nature's Gain over cosmetic surgery because I was concerned about the possible dangers and expense associated with cosmetic surgery and I wanted to try a natural alternative. I wish natural alternatives such as Nature's Gain were around ten years ago when I embarked on my career as a model.

I would recommend any woman wanting to firm and enlarge their breasts to try Nature's Gain. It is a safe and affordable alternative which doesn't cause any pain or discomfort. Taking Nature's Gain has helped keep my career on track and I recommend it to all my friends.

*Michelle*

## Editor's Comment

Over the years there have been many products brought to my attention that claim to firm or enlarge women's breasts. However, it does seem that at last there could be a credible alternative to cosmetic surgery by using Nature's Gain.

Considering the added endorsement of Ann Louise Gittleman, I would certainly try Nature's Gain before undertaking cosmetic surgery.
